

Senior Administrator Microsoft Cloud (m/f/d) - Tunis

Experience technical infrastructure! The department "Technical Infrastructure" operates the IT landscape at and for MaibornWolff. Our team of specialists actively designs and operates this infrastructure. Our agile organization using Kanban enables us to work with state-of-the-art technologies and to keep supporting lean processes.

With us you learn something new every day.

You develop personally and professionally – and always stay yourself. We are a colourful team and that is exactly what we want to remain. It's not about being a genius. Rather, we are looking for creative lateral thinkers and constructive questioners with intuition and sensitivity. What counts for us are people who work passionately for the success of a project.

- You have successfully completed your IT professional training or your studies and have at least 5 years of professional experience.
- You feel comfortable with Office 365, AzureAD, Exchange 2016, Exchange Online, Skype for Business, SharePoint Online and MS Teams.
- For years you have been running MS Active Directory services. Windows servers with their roles and services have been the basis of your IT landscapes.
- You love to structure, create concepts and automate recurring tasks. PowerShell, batch and automation tools are your tools of the trade.
- You have preferably good German skills and excellent skills in English.

Klaus, 38
System magician.
