

# Software Engineer Web (m/f/d) - Tunis

You are **passionate** about software applications that appeal to millions of people. About applications whose access rates explode overnight. You love highly integrative web apps that make processes tangible, apps that become the face of a wide variety of backend systems.

With us, you learn something new every day. You identify yourself with the code you develop – and always stay yourself. We are a vibrant, heterogenous team.

Amrei, 30.  
IT Architect.  
#whatsinmybag

- Yes, you are: enthusiastic about innovative web technologies and agile approaches such as Scrum, Kanban, Continuous Integration and Test-Driven Development.
- You have strong communication skills and you're involved in our communities.
- You have completed your technical studies or a similar education, and you've gained several years of project experience in web development.
- Your developer knowledge of JavaScript, Java, PHP and CMS is profound.
- Ideally, you have experience in React, Angular, Vue.js, HTML5 or CSS3, Java (Spring Boot).
- OOP, MVC, JSON, CSS preprocessors like SCSS, web testing and versioning are familiar to you.
- Your English is very good, ideally you speak German too.

It's not about being a genius. Rather, we are looking for creative people who think out of the box – thinkers and constructive questioners with intuition and sensitivity. What counts for us are people who work passionately for their projects' success.

MaibornWolff designs and develops sophisticated individual software solutions. We implement systems for customers from different sectors with heterogenous system landscapes. It is our objective to analyze, identify and process our customers' requirements.

We propose tailored solutions and develop new systems and new processes that support and enhance their businesses – while connecting their systems and allowing a smooth exchange of information.
